MOBILE DRONE DETECTION UNIT

DEDRONE.COM

GAIN COMPLETE CONTROL OF YOUR AIRSPACE

Globally, public safety agencies are now exposed to an ever-increasing threat from the sky. Drones are easier to fly, cheaper to buy, and capable of carrying heavier payloads. Dedrone provides a complete counter-sUAS platform, enabling law enforcement agencies to detect, track and identify drones and locate their pilots.

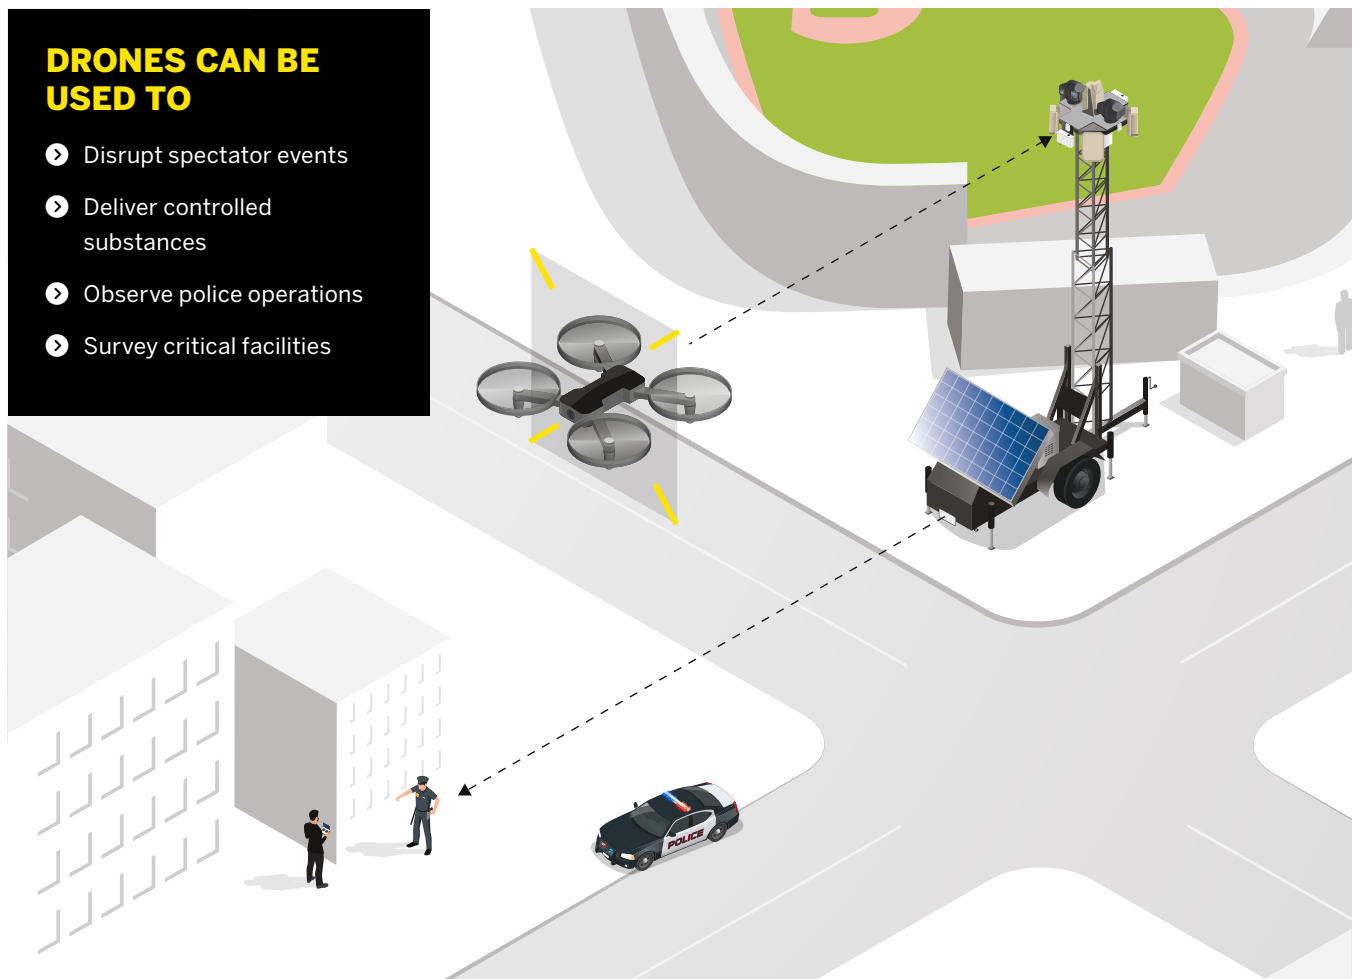

The DedroneRapidResponse trailer was instrumental in ensuring that we could safeguard the airspace and deliver the level of security needed for these high-profile events. Dedrone by Axon's technology gave us the confidence and capability to handle any drone threats effectively.

JEREMY BLAKE, DRONE PROGRAM COORDINATOR, COBB COUNTY SHERIFF'S OFFICE

DRONES CAN BE USED TO

- ▶ Disrupt spectator events
- ▶ Deliver controlled substances
- ▶ Observe police operations
- ▶ Survey critical facilities

An MLB game was delayed by an unauthorized drone

DedroneRapidResponse+

Available in U.S. Only

Set-up in less than 20 min

Multi-sensor set-up can include RF, Radar, and PTZ Cameras

Detects nearly 600 drones from over 150 manufacturers

Folded: L x H x W: 20.2' x 9.7' x 6'
Upright: L x H x W: 19.7' x up to 44.3' x 11.5'
Weight: 5200 lb or 2360 kg

Power: Integrated generator

LTE, Wi-Fi, LAN, Starlink

As former Chief of Operations of FBI's Counter UAS Unit, and Chief Security Officer for Preakness Stakes, I knew Dedrone was the ideal airspace security partner to provide detection, analytics and protection for our event. Dedrone allowed our team to focus on executing the safe, stellar race day operations that 1/ST is known for.

Rob D'Amico, Former Chief of Operations of FBI's Counter UAS Unit, and Chief Security Officer for 1/ST

ABOUT DEDRONE BY AXON

Dedrone by Axon offers an end-to-end airspace security solution that delivers best-in-class detection, identification, tracking, and mitigation of unauthorized drones, and enable drone as first responder to fly Beyond Visual Line of Sight.
